

ALIGNMENT TO HEAD START PARENT, FAMILY, and COMMUNITY ENGAGEMENT FRAMEWORK

Family Well-being	The ReadyRosie library consists of hundreds of videos showing a variety of real families modeling healthy interactions. Each family operates with unique cultural and individual values and behaviors. ReadyRosie users are exposed to many opportunities to see how parents and caregivers influence a child's view of himself as an individual and a member of a family.
Parent-Child Relationships	The goal of all ReadyRosie videos is to inspire parents and caregivers to invest time in bonding with their children. These bonding experiences provide a safe and fun context for children to practice listening and speaking and learning positive ways to interact with others.
Families as Lifelong Educators	ReadyRosie has a library of over 1200 short videos in English and in Spanish that model how parents and families can observe, guide, promote, and participate in the everyday learning of their children at home, school, and in their communities.
Families as Learners	ReadyRosie features over 75 short and quick videos that help families understand best practices around child development. These learning videos create a path for families to experience adult learning on the go.
Family Engagement in Transitions	ReadyRosie offers content for families of children ages birth through third grade, to help families navigate the various transitions in early childhood.
Family Connections to Peers and Community	The ReadyRosie SHARE platform allows teachers to connect with families and share specific content with them. This year, in 2017, that platform will be enhanced to include two-way family/ teacher communication and ReadyRosie Community, which will allow families to post, share, and discuss their parenting experiences, questions and celebrations.
Families as Advocates and Leaders	ReadyRosie SHARE platform builds communication and relationships between family and teacher, which has proven to be a foundation for family leadership and advocacy. ReadyRosie equips and inspires families to be their child's first teacher. Research shows that when families grow in their knowledge around child development and outcomes, they are more confident and more likely to become advocates and leaders in their own school communities.
